

Information on Adverse Sustainability Impacts

Version 2.0 as of June 2021

Principal Adverse Impacts Statement:

Universal-Investment Ireland (UII) has delegated the investment management function to a range of Investment Managers who undertake the investment decisions on behalf of the Funds. Many of these Investment Managers consider the principal adverse impacts of investment decisions on sustainability factors. Given that the investment management function of the Funds is delegated to certain Investment Managers, UII relies on the investment policies and processes of the delegate Investment Managers and, therefore, does not itself consider the principal adverse impacts of investment decisions on sustainability factors. Sustainability factors are defined as environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.
